Dear Mr Williams

I hope this email finds you well. Following publication of the various Ends Reports the local community group, Cleaner Bentham, has become increasingly concerned about how PFAS environmental contamination is affecting the health of residents.

As you know, some PFAS are toxic and can cause harm to both humans and wildlife. They have been linked to a wide range of serious illnesses, including certain cancers.

We have been approached by concerned residents interested in blood testing, which is not funded by the NHS. Thus, we are writing to ask if Angus Fire would provide financial aid or a medical grant for the PFAS blood tests, to be carried out by an independent medical organisation appointed by Cleaner Bentham, for the local community. You have spoken about your commitment to doing the right thing in Bentham and of maintaining your positive relationship with your neighbours. As such, we would appreciate your support with this matter.

Thank you for your consideration and I look forward to hearing from you.

Yours Sincerely,

Mat MacEley-Young
Cleaner Bentham Group
